

Backend Controllers and Response Formats

controllers/admin/auth/adminController.js

Function: login

Responses:

```
{ status: false, error: v.errors, message: "Validation failed" }
```

```
{ status: false, message: "Invalid email or password" }
```

```
{
  status: true,
  message: admin.isDefaultPassword
    ? "Logged in with default password, please change your password"
    : "Admin logged in successfully",
  mustChangePassword: admin.isDefaultPassword,
  data: admin,
}
```

```
{ status: false, message: "Server error", error: error.message }
```

Function: sendChangePasswordOtp

Responses:

```
{ status: false, message: "Admin not found" }
```

```
{ status: false, message: "Failed to send OTP email" }
```

```
{ status: true, message: "OTP sent to your email" }
```

```
{ status: false, message: "Server error", error: error.message }
```

Function: changePassword

Responses:

```
{ status: false, error: v.errors, message: "Validation failed" }
```

```
{ status: false, message: "Admin not found" }
```

```
{
  status: false,
  message: "Invalid or expired OTP",
}
```

```
{ status: true, message: "Password changed successfully, please login again with new password",  
data: admin }
```

```
{ status: false, message: "Server error", error: error.message }
```

Function: `getMyProfile`

Responses:

```
{ status: false, message: "Admin not found" }
```

```
{ status: true, message: "Profile fetched successfully", data: admin }
```

```
{ status: false, message: "Server error", error: error.message }
```

controllers/admin/hotelController/adminHotelController.js

Function: `createHotel`

Responses:

```
{ status: false, error: v.errors, message: "Validation failed" }
```

```
{ status: true, message: "Hotel created successfully", data: hotelInsert }
```

```
{ status: false, message: "Server error", error: error.message }
```

Function: `getMyHotels`

Responses:

```
{ status: true, message: "Hotels fetched successfully", data: hotels }
```

```
{ status: false, message: "Server error", error: error.message }
```

Function: `updateHotel`

Responses:

```
{ status: false, error: v.errors, message: "Validation failed" }
```

```
{ status: false, message: "Hotel not found" }
```

```
{ status: true, message: "Hotel updated successfully", data: hotel }
```

```
{ status: false, message: "Server error", error: error.message }
```

Function: `deleteHotel`

Responses:

```
{ status: false, error: v.errors, message: "Validation failed" }
```

```
{ status: false, message: "Hotel not found" }
```

```
{ status: true, message: "Hotel deleted successfully", data: hotel }
```

```
{ status: false, message: "Server error", error: error.message }
```

Function: `createManager`

Responses:

```
{ status: false, error: v.errors, message: "Validation failed" }
```

```
{ status: false, message: "Hotel not found" }
```

```
{ status: false, message: "Employee already exists with this email" }
```

```
{ status: true, message: "Manager created successfully, default password is the manager email",  
  data: managerInsert }
```

```
{ status: false, message: "Server error", error: error.message }
```

Function: `getMyManagers`

Responses:

```
{ status: true, message: "Managers fetched successfully", data: managers }
```

```
{ status: false, message: "Server error", error: error.message }
```

Function: `updateManager`

Responses:

```
{ status: false, error: v.errors, message: "Validation failed" }
```

```
{ status: false, message: "Manager not found" }
```

```
{ status: false, message: "You are not allowed to manage this manager" }
```

```
{ status: false, message: "Hotel not found" }
```

```
{ status: true, message: "Manager updated successfully", data: manager }
```

```
{ status: false, message: "Server error", error: error.message }
```

Function: `deleteManager`

Responses:

```
{ status: false, error: v.errors, message: "Validation failed" }
```

```
{ status: false, message: "Manager not found" }
```

```
{ status: false, message: "You are not allowed to manage this manager" }
```

```
{ status: true, message: "Manager deleted successfully", data: manager }
```

```
{ status: false, message: "Server error", error: error.message }
```

Function: `getMyDashboardStats`

Responses:

```
{
  status: true,
  message: "Stats fetched successfully",
  data: {
    totalBookings: totalBookings,
    totalRevenue: revenue.length > 0 ? revenue[0].totalRevenue : 0
  }
}
```

```
{ status: false, message: "Server error", error: error.message }
```

controllers/employee/auth/employeeController.js

Function: `login`

Responses:

```
{ status: false, error: v.errors }
```

```
{
  status: false,
  message: "Your account is deactivated, please contact admin",
}
```

```
{
  status: true,
  message: employee.isDefaultPassword
    ? "Logged in with default password, please change your password"
    : "Employee logged in successfully",
  mustChangePassword: employee.isDefaultPassword,
  data: employee,
}
```

```
{
  status: false,
  message: "Invalid email or password",
}
```

```
{
  status: false,
  message: "Server error",
  error: error.message,
}
```

Function: `changePassword`

Responses:

```
{
  status: false,
  error: v.errors,
  message: "Validation failed",
}
```

```
{
  status: false,
  message: "Employee not found",
}
```

```
{
  status: false,
  message: "Old password is incorrect",
}
```

```
{
  status: false,
  message: "New password must be different from old password",
}
```

```
{
  status: true,
  message: "Password changed successfully, please login again with new password",
  data: employee,
}
```

```
{
  status: false,
  message: "Server error",
  error: error.message,
}
```

Function: forgotPassword

Responses:

```
{
  status: false,
  error: v.errors,
  message: "Validation failed",
}
```

```
{
  status: false,
  message: "Employee not found with this email",
}
```

```
{
  status: false,
  message: "Failed to send OTP email",
}
```

```
{
  status: true,
  message: "Password reset OTP sent to your email",
  data: {
    email: employee.email,
  },
}
```

```
{
  status: false,
  message: "Server error",
  error: error.message,
}
```

Function: getMyProfile

Responses:

```
{
  status: false,
  message: "Employee not found",
}
```

```
{
  status: true,
  message: "Profile fetched successfully",
  data: employee,
}
```

```
{
  status: false,
  message: "Server error",
  error: error.message,
}
```

controllers/employee/hotelController/bookingController.js

Function: `getHotelBookings`

Responses:

```
{
  status: false,
  error: v.errors,
  message: "Validation failed",
}
```

```
{
  status: false,
  message: "Only manager can view own hotel bookings",
}
```
