

Hotel Booking System - Complete Working Flow

Step 1: User Registration & Login

A customer creates an account and logs into the system. Existing users can log in directly.

Step 2: Hotel Discovery

Customers browse hotels based on city, location, ratings, amenities, and room availability.

Step 3: Hotel Details

Customers view hotel information such as description, images, facilities, room types, pricing, and reviews.

Step 4: Room Selection

Customers select a room based on budget, occupancy, facilities, and availability.

Step 5: Availability Check

The system verifies whether the selected room is available for the requested dates.

Step 6: Booking Creation

The customer confirms the booking by selecting check-in and check-out dates and providing guest details.

Step 7: Payment Processing

The customer completes payment and the booking status is updated accordingly.

Step 8: Booking Confirmation

The system generates a booking confirmation and reservation details.

Step 9: Check-In Process

Upon arrival, the hotel verifies the booking and marks the customer as checked in.

Step 10: Stay Management

The customer stays in the hotel and may request additional services if available.

Step 11: Check-Out Process

At the end of the stay, the booking is closed and room status becomes available again.

Step 12: Reviews & Ratings

Customers can submit ratings and reviews based on their stay experience.

Admin Flow

Admins manage hotels, rooms, pricing, amenities, bookings, customers, offers, and reports.

Reports & Analytics

The system generates reports for bookings, revenue, occupancy, cancellations, customers, and hotel performance.

Complete Business Flow

User Registration/Login → Hotel Search → Hotel Details → Room Selection → Availability Check → Booking → Payment → Confirmation → Check-In → Stay → Check-Out → Review & Rating → Reports & Analytics
